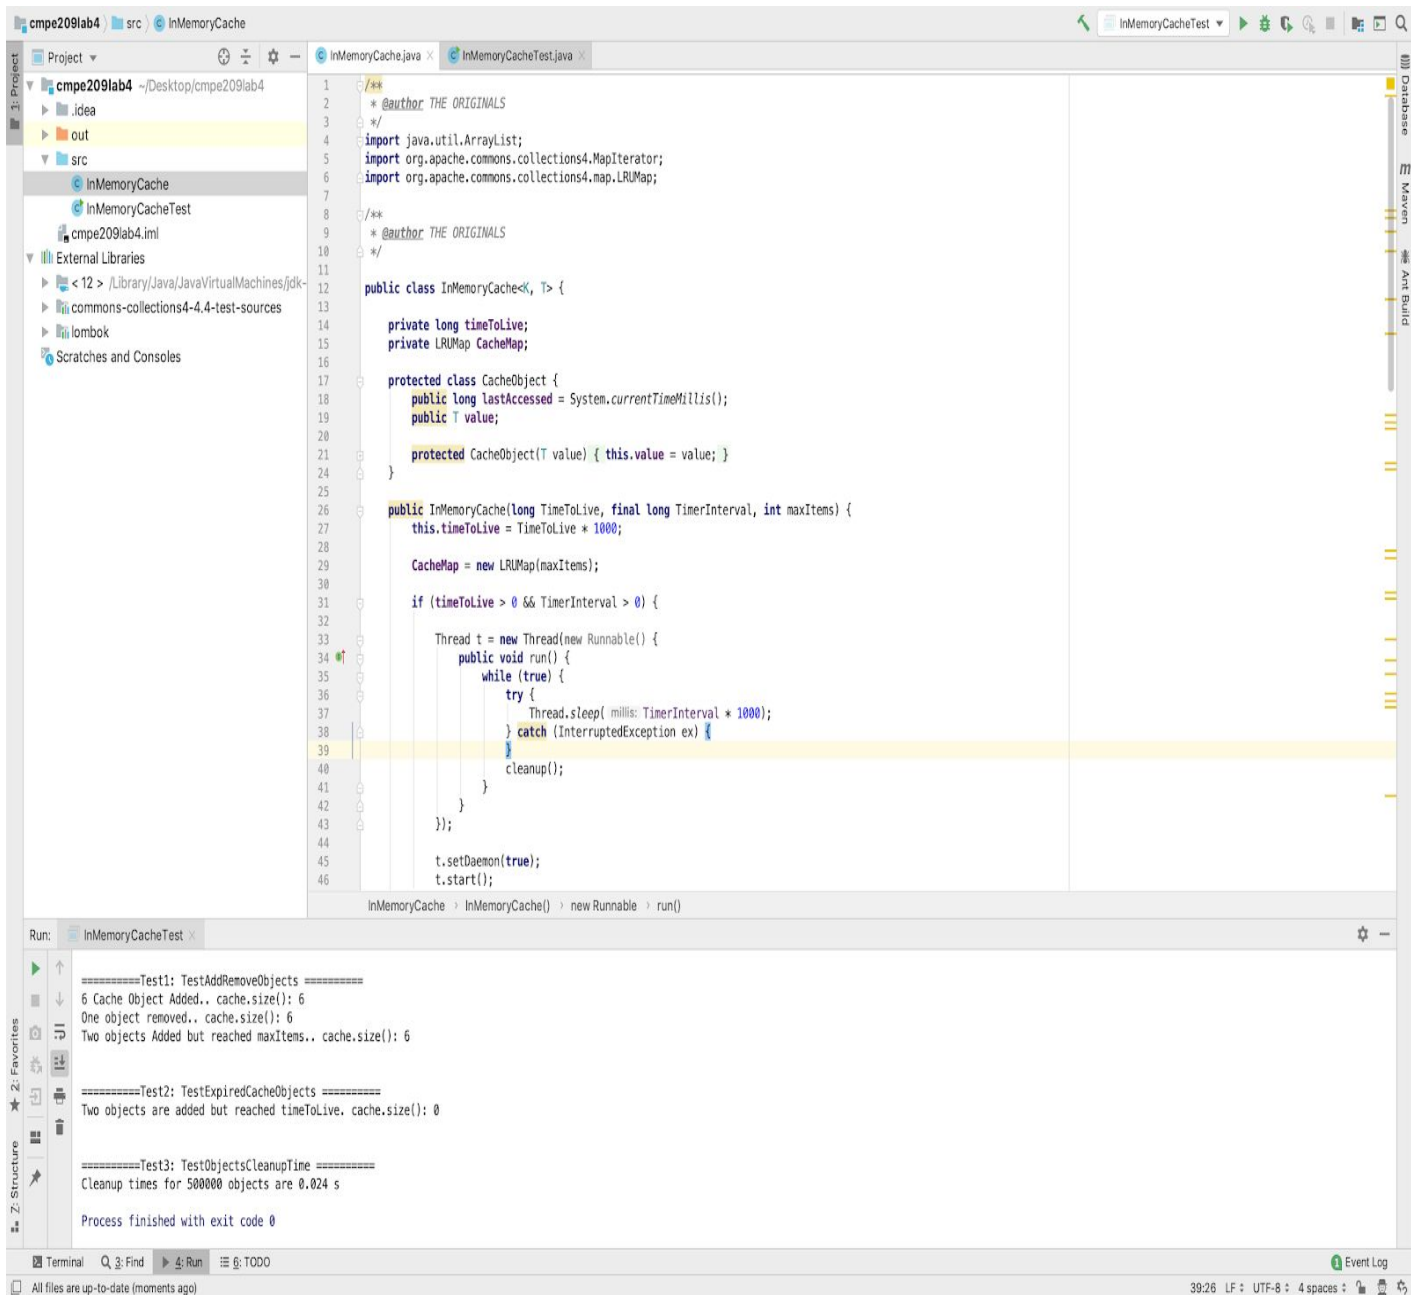

Fig1. Output which shows the addition and removal of objects with different Time To Live(TTL),

Notes:

A maximum limit is set for the number of objects that can be created.

Cache Items are added.

6 Objects are created which contain “key-value” pairs.

The test class is used to test the application to implement the following functionality.

Add/ Remove functionality is programmed.

Check if the time for a stored object is expired.

The time the object was deleted is printed to the console.
